

Blend Price Stabilizer

Ideal for all herds during a low milk price cycle.

- Available to all Dairylea and DFA farms.
- Stabilizer term is variable depending on milk price and farm financials.
- The Stabilizer pays a steady Blend price during the term of the agreement.
- When milk prices are low, the Blend Price Stabilizer helps support the price.
- When milk prices are high, the accrued Blend Price Stabilizer debt is returned from the farm.
- During the Blend Price Stabilizer, Risk Management Services will maintain an accounting record which tracks the difference between the stabilizer price and the member pay price. At the end of the program, any difference will be settled up between the member and Dairylea.

The Blend Price Stabilizer allows dairy herds to better manage their cash flow during a low milk price cycle. Various terms, conditions and fees apply.

Members must apply for acceptance into the Blend Price Stabilizer program. To find out more, contact your field staff representative or Katie Rossini at 1-800-654-8838, ext 5581.
